

EVERYONE CAN EXPERIENCE A SAFE WORKING ENVIRONMENT WITH ZONITH'S ID CARDHOLDER

- Discreet panic alarm button on the back.
- Indoor positioning transmitter so your colleagues know where you are, if an emergency arises.
- If you go outside, it connects directly with your smartphone and uses GPS positioning.
- If an alarm is triggered, colleagues or guards are notified automatically, fast and efficiently.

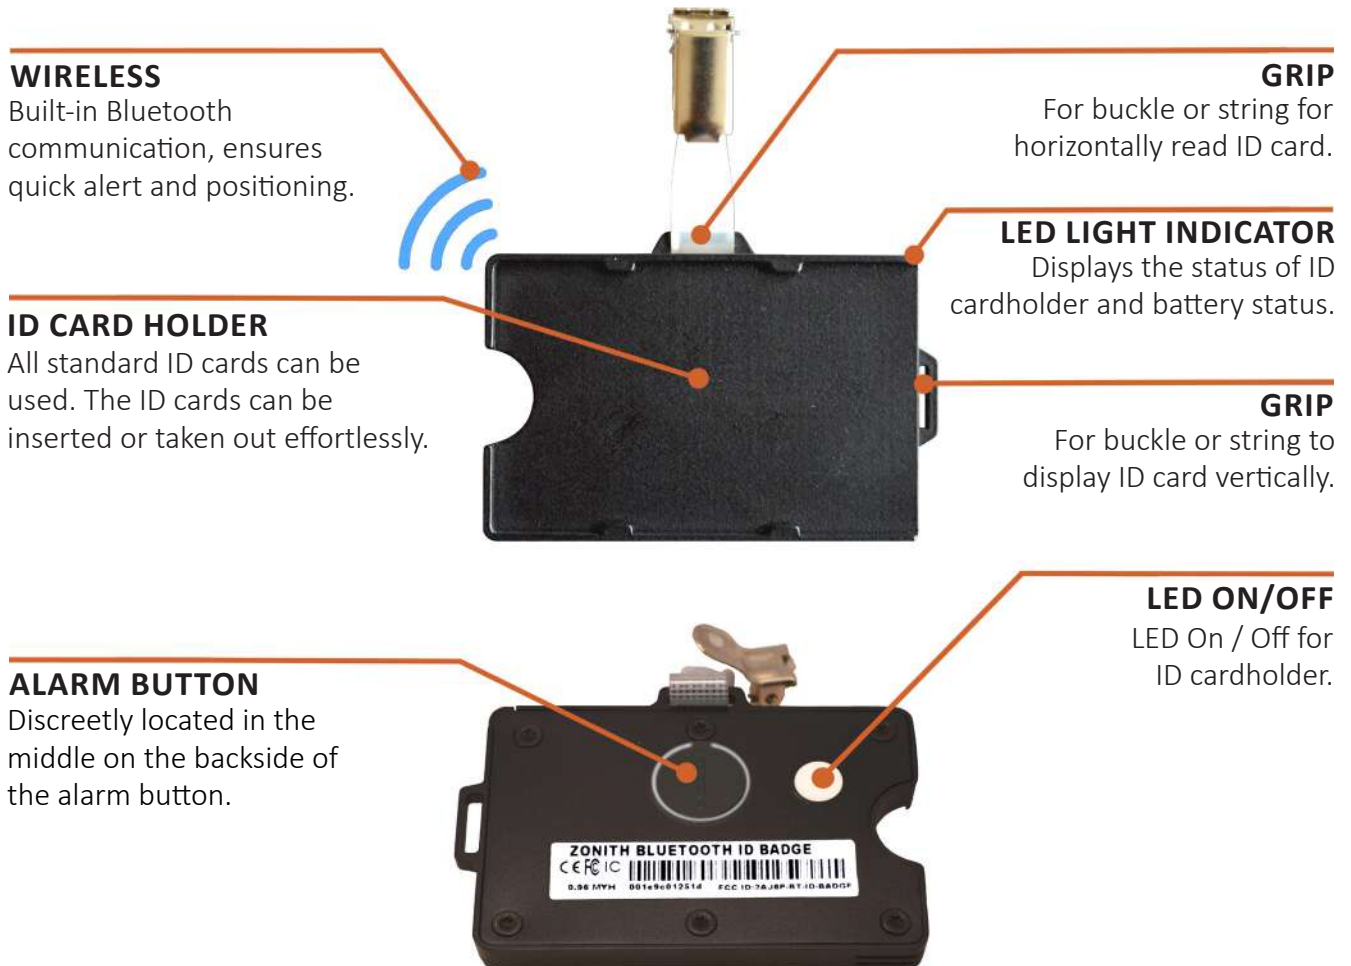

SAFETY AT WORK, BOTH INSIDE AND OUT!

ZONITH's ID cardholder secures employees and visitors with discreet panic alerting and positioning. ZONITH's ID cardholder works as a regular ID cardholder, but has built-in wireless security features.

SAFETY FOR WORKING INDOORS

ZONITH's smart receiver boxes ensure security within. The receivers only connect to the common computer network and will both receive panic alarms and position the ID cardholder(s).

SAFETY FOR WORKING OUTDOORS

The ID cardholder also provides security when working outside. The physical alarm button on the ID cardholder connects automatically to Smartphone when it is detected outside

- GPS positioning works in conjunction with an smartphone.
- The GPS position can either be displayed as one address or as a readily recognizable name, eg. "Parking lot".
- The smartphone app also has an alarm button on the screen for situations where an ID card holder is not supported.
- The smartphone redirects alarms to the ZONITH system, which informs colleagues, guards, or other relevant personee
