

## STAFF SAFETY - PANIC ALERTING AND POSITIONING

### Indoor Protection

Staff and visitors wear Bluetooth ID Badges or Compact Panic Buttons.

Their position will be monitored by the Bluetooth Receiver.

Panic alarms from ID Badges or fixed wireless panic buttons will also be monitored by the Bluetooth Receiver.

The ZONITH Solution notify about the incident on the Alarm Display, Mass Notification Pop-Up, smartphones and mountable tablets.

### Outdoor Protection

The ZONITH smartphone app will continuously position the user outside buildings via GPS Outdoor positioning.

Panic alarms can be raised from the smartphone but also from the SAME Bluetooth ID Badge/Compact Panic Button as used inside. The ID Badge/Compact Panic Button now communicates with the smartphone.

When an alarm is raised the App will pass the alarm on to the ZONITH solution. Communication via mobile network or WLAN.

The ZONITH solution will instantly notify colleagues or emergency response team in cleartext.

The notification contain detailed information about the person in distress as well as the GPS position of the person.

## Personal Safety Devices

#### ZONITH APP

Smartphone App for both Android and iOS users – safety at your hand!

#### BLUETOOTH ID BADGE

You can carry it everywhere, and nobody will even notice that it has a built-in panic button on the backside of it.

#### BLUETOOTH RECEIVER

Receiving alarms and precise positioning information inside the buildings was never that easy!

#### PANIC BUTTON

Small and easy to mount on walls or under the desks in any desired areas!

#### COMPACT PANIC BUTTON

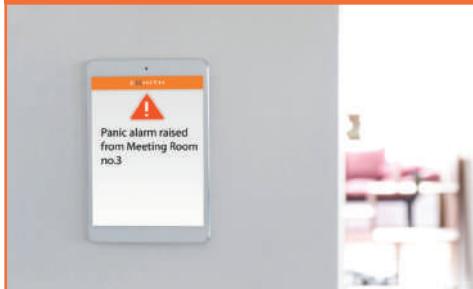

Small wearable panic button with long-lasting battery and multiple ways to wear it!

**Quickest possible reaction to any alarms raised, emergency situations or technical failures.**

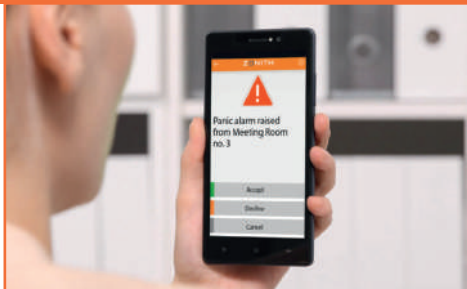

If you feel unsafe or threatened, you can at anytime press one of our panic buttons.

Your colleagues, first responders, security guards or your emergency response centre will receive the alarm message immediately, with all the necessary information needed to take action and react.

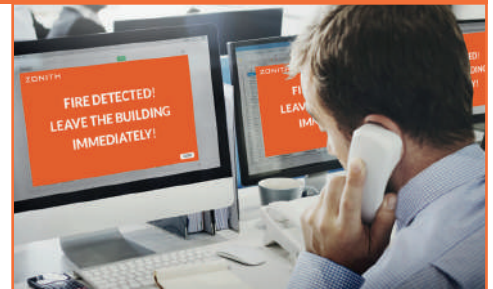

### How you get notified about the alarms?

**ALARMS ON  
WALL-MOUNTED  
SCREENS**

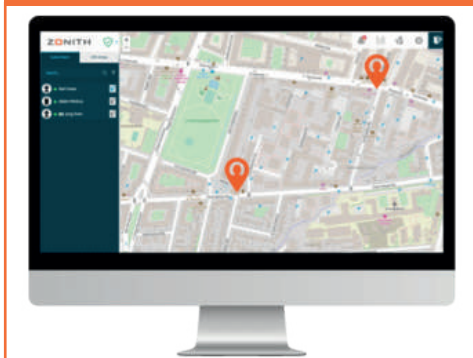

**SMARTPHONE  
APP ALARM  
SCREEN**

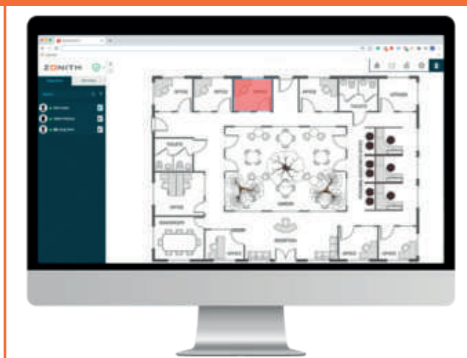

**DESKTOP  
ALARM  
POP-UP**

### Your alarm control station overview

**OUTDOOR MAP**

Outlines the exact location of any employee working outside.

**INDOOR MAP**

Outlines the location of employees working inside.

**ALARM DISPLAY**

Provides easy, visual representation and management of alarms.

### You can freely choose if First Responders or Emergency Response Team will receive the alarms

First Responders can be security guards working in your company or security provider who is responsible for monitoring your facility.

Whenever an alarm is raised, they will be notified with detailed information about how to reach or help you.

Emergency Response Team monitors around the clock.

You can rest assured that your alarms are checked continuously, and they will dispatch the right authorities to help you.

*„No matter where you are located ZONITH staff safety solutions will safeguard you.“*
