

## STAFF PROTECTION IN PUBLIC ORGANISATIONS

### Do you have:

*Demands from government/public authorities to increase staff safety in your facilities?  
Old ineffective, inflexible and very expensive and complicated to maintain existing systems?*

## ZONITH CENTRALISED SERVER SOLUTION

- Easy integration and ability to add multiple buildings when the need arises
- Panic Alerting - panic buttons to wear and to mount
- Monitoring all the alarms by using only one system for all buildings
- New advanced and flexible safety and security functions
- Positioning of the staff when a panic alarm is raised
- Automatic notification to colleagues and guards
- Fast reaction time to incidents
- Cost-effective solution
- Easy maintenance

### INDOOR

*Mountable wireless panic buttons for receptions and meeting rooms.*

*Low energy technology provides many years of battery life.*

*Indoor positioning for rapid response from your colleagues.*

*ID cardholder with a discrete panic button on the backside.*

*Alarms on smartphones, wall-panels, flashlight and sounder.*

### PROTECTION

### OUTDOOR

*Wearable ID cardholder with a discreet panic button to use both in- and outdoor.*

*When working outdoor the panic button connects to the smartphone with the ZONITH app.*

*Uses your existing smartphone to transmit the alarm to call for assistance.*

*GPS position and alarm information are automatically sent to the emergency response team or colleagues.*
